

# MEPS SRC SPOTLIGHT

## Edition 1 | Term 3

### Welcome to Term 3...

And welcome to our very first edition of the **SRC Spotlight!**

Each week the SRC would like to share with you some of the very important initiatives, projects and people in our wonderful MEPS community. This week one of our SRC Leaders, Juliette L. shares a little about herself and the Semester 1 report from our SRC Team.

#### Juliette | SRC Leader 2020.

##### What is your role as SRC Leader?

Firstly to work with our other SRC Leader, Liv, Mrs Urquhart and the rest of the SRC team. I help to guide the school through the development of projects based on student ideas.

##### What would you like to achieve as an SRC representative and leader?

One of my ideas was to get the school involved in the **MS Readathon**, I've been involved for the past three years. Reading is my thing, it's what I love! The **MS Readathon**, raises money for people in need and that money goes to scientists to help find a cure for a lesser-known disease that needs more support. I would also like to accomplish being a good SRC leader by helping the school.

##### What do you love about MEPS?

There's so many things! The teachers, the whole experience! I like everything about it, the programs, the camps, it's a fun combination of everything a school needs to be.

#### SRC Report | Semester 1.

Towards the end of Term 2, the SRC team were meeting regularly to decide on a direction for Term 3 (or Term 4, depending on lockdown restrictions). Your class SRC reps may have already surveyed you to get your view on this. Our ideas explore three areas within the school: **developing sensory playgrounds, improving waste management systems and celebrating Indigenous culture**. All of these projects are important and student voice will be used to determine which project we focus on first within our school.

Although we have been in isolation, we still wanted to share our Semester One achievements. Unfortunately, our Pyjama Day was cancelled at the end of Term One, however we want to thank our MEET Team reps for helping out and giving the Green Day funds to the **Mornington Peninsula Kola Conservation Project**. Also, congratulations to Tilly S. for driving 'Tracky Dack Day', on the 29<sup>th</sup> of May, during remote learning. With only Prep to Grade Two at school, we raised \$207.35 for **TLC Kids** who work with unwell kids in hospitals.

**Tune in next week, where we interview another MEPS student and remember to stay safe.**
